Join us for a lively discussion on innovation for manufacturing and the utility of research in this area for future development of our region. Presentations will address relevant research projects being undertaken by the School of Business. Don Wright from the University Launch Pad will discuss how the Launch Pad is utilising some of these emerging ideas with its start-up business clients.

These presentations will be followed by a wide ranging and interactive expert panel discussion. Panelists will assess how they see these projects and the ideas and the methods they employ contributing to further engagement activities between the School of Business and local and regional industry.

Our Panelists are:

Ben Artup - Associate Director, Deloitte Access Economics
David Borger - Western Sydney Director, NSW Business Chamber
Tamara Brown - Director, PwC
Julianne Christie - Senior Policy Management, Economic Development, Fairfield City Council
Shaira Ismail - Senior Manager, R&D Incentives, KPMG
Graeme Newell - Professor, School of Business
