While Government rebates are still in place there's never been a better time to take control of your business energy and start saving.

INTRODUCING SOLAR CLOUD

We all know solar is the way of the future, but now its never been easier or more cost efficient to get on board.

With no upfront costs, savings of up to 65% on your energy costs, and super easy management - it's solar power like you've never seen before.

Our system also incorporates LEDs and voltage optimisation; plus we assess and find the best energy rates for your company's size, type and usage - so we're more than just solar too.

SMART POWER

Solar Cloud's world first technology creates solar power more efficiently than any other company, which is how we can offer such low energy costs to companies (and individuals).

Our hassle-free approach means a simple yet sophisticated system designed simply to save your business money, and help the environment. With nothing to outlay up front, your business could start saving on power bills instantly.
